

# PT GoTo Gojek Tokopedia, Tbk

## Full Year 2025 & FY2026 Outlook

Prepared by: Syahraini · Portfolio Deliverable · June 2026

### EXECUTIVE SUMMARY

- Revenue Performance:** GoTo's delivered strong revenue growth of 15,3% YoY, reaching Rp18,3T in FY2025. This expansion was primarily driven by the Lending segment, which nearly doubled revenue (+95,4% YoY) and emerged as the Company's main growth engine.
- Expense Spending:** Operating expenses increased by only 3,1% YoY, significantly below revenue growth of 15,3%, demonstrating continued cost discipline. This operating leverage reduced operating losses by 83,0% to Rp378B, leaving the company just 2,1% away from operating breakeven.
- Key Management Focus:** Rapid lending expansion is becoming GoTo's primary growth driver, making credit quality an increasingly important area to monitor. While the current 89,0% coverage ratio for receivables more than 30 days past due reflects prudent provisioning, management should continue evaluating credit scoring effectiveness to ensure asset quality keeps pace with portfolio growth.

| Net Revenue                  | Operating Loss                    | Operational Cash Flow               | Gross Margin                |

### 1. REVENUES ANALYSIS

GoTo delivered strong revenue growth of 15,3% YoY in FY2025. Growth was primarily driven by the Lending segment, while the Company's core revenue streams, Delivery Service and Service Fee, remained relatively stable. The revenue mix indicates an increasing reliance on financial services as a key driver of future growth.

| Revenue Segment        | FY2024 (Rp Million) | FY2025 (Rp Million) | Growth YoY    | FY2025 Contribution |
|------------------------|---------------------|---------------------|---------------|---------------------|
| Delivery Service       | 5,344,984           | 5,779,206           | +8,1%         | 31,5%               |
| Service Fee            | 5,801,835           | 5,689,230           | -1,9%         | 31,1%               |
| Lending                | 1,935,389           | 3,780,801           | +95,4%        | 20,6%               |
| E-commerce Service Fee | 621,871             | 819,724             | +31,8%        | 4,5%                |
| Advertising Fee        | 554,997             | 533,268             | -3,9%         | 2,9%                |
| Others                 | 1,635,386           | 1,719,888           | +5,2%         | 9,4%                |
| <b>TOTAL</b>           | <b>15,894,462</b>   | <b>18,322,117</b>   | <b>+15,3%</b> | <b>100,0%</b>       |

#### ❖ Service Fee Remains a Key Area to Monitor

Delivery Service and Service Fee remain GoTo's primary revenue drivers, contributing a combined 62,6% of total revenue. However, the 1,9% YoY decline in Service Fee suggests that the segment has yet to stabilize following the FY2024 structural break caused by Tokopedia's deconsolidation. Further analysis is required to determine whether the continued weakness reflects competitive pressures or an ongoing normalization of the post-restructuring revenue base.

### ❖ Lending Continues to Drive Growth, While Credit Risk Becomes Increasingly Important

Lending has become GoTo Financial's fastest-growing business, reflecting the Company's accelerated expansion in digital lending. While current provisioning remains prudent, sustaining portfolio quality will be increasingly important as loan growth continues to outpace the broader business.

## 2. EXPENSES ANALYSIS

Operating expenses increased by only 3.1% YoY, significantly below revenue growth of 15.3%. This positive operating leverage demonstrates that GoTo continues to scale revenue more efficiently than its cost base, resulting in a substantial improvement in operating profitability.

| Costs and Expenses                   | FY2024 (Rp Million) | FY2025 (RpMillion) | Growth YoY   | % of Revenue FY2025 |
|--------------------------------------|---------------------|--------------------|--------------|---------------------|
| Cost of Revenues                     | 7,413,392           | 7,746,034          | +4,5%        | 42,3%               |
| General & Administrative Expenses    | 4,396,253           | 3,988,925          | -9,3%        | 21,8%               |
| Sales & Marketing Expenses           | 2,849,934           | 3,090,124          | +8,4%        | 16,9%               |
| Product Development Expenses         | 1,756,068           | 2,152,272          | +22,6%       | 11,7%               |
| Operational & Support Expenses       | 975,514             | 974,464            | -0,1%        | 5,3%                |
| Depreciation & Amortization Expenses | 744,175             | 748,552            | +0,6%        | 4,1%                |
| <b>TOTAL</b>                         | <b>18,135,336</b>   | <b>18,700,371</b>  | <b>+3,1%</b> | <b>102,1%</b>       |

| Breakdown by Nature                  | FY2024    | FY2025    | Growth | Catatan             |
|--------------------------------------|-----------|-----------|--------|---------------------|
| Cost of Delivery Services            | 5,570,345 | 5,650,877 | +1,4%  | Core operating cost |
| Salaries & Employee Benefits         | 3,357,268 | 3,612,662 | +7,6%  | Operating cash cost |
| Advertising & Marketing              | 1,391,983 | 1,696,292 | +21,9% | Growth investment   |
| IT Dev & Infrastructure              | 1,490,573 | 1,598,360 | +7,2%  | Platform investment |
| Customer Incentives                  | 1,347,006 | 1,076,940 | -20,1% | Subsidies reduced * |
| Share-based Compensation             | 1,374,008 | 593,356   | -56,8% | Non-cash **         |
| Depreciation & Amortization Expenses | 744,175   | 748,552   | +0,6%  | Non-cash            |

\* The impact on transaction volume and Monthly Active Users needs to be confirmed. \*\* SBC is a non-cash expense; its decrease improves the P&L without reflecting cash efficiency.

### ❖ G&A Efficiency of 9,3%: Overhead optimization continues

G&A expenses declined by Rp407M (9,3% YoY), extending the cost reductions achieved following Tokopedia's deconsolidation in FY2024. This suggests that organizational restructuring and overhead optimization continue to improve GoTo's operating cost base while supporting a leaner organizational structure.

### ❖ SBC Down 56,8%: Profitability Improves, Cash Flow Unchanged

Share-based compensation (SBC) declined by 56,8% YoY, providing a significant boost to reported profitability. However, as SBC is a non-cash expense, the improvement does not reflect stronger operating cash generation. The decline likely reflects the completion of legacy employee vesting schedules rather than a structural improvement in operating efficiency.

#### ❖ Product Development +22,6%: Investment ongoing amid efficiency

Product development expenses increased by Rp396M (22,6% YoY), indicating that GoTo continues to invest in technology and platform capabilities despite broader cost optimization efforts. This suggests that expense discipline has been applied selectively, preserving investments that support long-term growth and competitiveness.

#### ❖ Customer Incentives Down 20,1%: Profitability Improves, Growth Needs Validation

Customer incentives declined by Rp270M (20,1% YoY), supporting margin improvement through lower subsidy spending. However, the impact on business performance should be validated by monitoring transaction growth and Monthly Active Users (MAU/MATU) to ensure that lower incentives are not affecting customer engagement or platform activity.

### 3. OPERATING PERFORMANCE

| Items                       | FY2024 (Rp Million) | FY2025 (Rp Million) | Delta             |
|-----------------------------|---------------------|---------------------|-------------------|
| Net Revenues                | 15,894,462          | 18,322,117          | +2,427,655        |
| Total Costs and Expenses    | (18,135,336)        | (18,700,371)        | +565,035          |
| <b>Loss from Operations</b> | <b>(2,240,874)</b>  | <b>(378,254)</b>    | <b>+1,862,620</b> |
| Operating Cash Flow         | (622,114)           | +307,025            | +929,139          |
| CAPEX                       | (6,518,862)         | (1,182,360)         | +5,336,502        |
| Free Cash Flow              | (7,140,976)         | (875,335)           | +6,265,641        |
| FCF Margin (%)              | (44,9%)             | (4,8%)              | +40,1%            |

#### ❖ Positive Operating Cash Flow: A Key Financial Milestone

GoTo generated positive operating cash flow (OCF) of Rp307M for the first time, marking a significant milestone in its financial transformation. This indicates that the Company's core operations are now capable of funding day-to-day business activities, reducing its reliance on external financing and signaling that the burn-rate phase has largely come to an end.

#### ❖ Negative Free Cash Flow Reflects Growth Investment, Not Operational Weakness

Despite achieving positive operating cash flow, Free Cash Flow (FCF) remained negative due to continued capital expenditures of Rp1,2T. This suggests that cash outflows are primarily driven by strategic investments in technology infrastructure and ecosystem expansion rather than weaknesses in the underlying business. As a result, current FCF should be viewed as an investment decision rather than a liquidity concern.

#### ❖ Strong Liquidity Provides Strategic Flexibility

GoTo ended FY2025 with cash and cash equivalents of Rp21,8T, providing a strong liquidity position to support strategic investments while maintaining a healthy ability to meet short-term obligations. This financial flexibility allows the Company to continue funding growth initiatives without placing immediate pressure on its balance sheet.

## 4. FY2026 SCENARIO

| Revenue Segments       | FY2025<br>(Rp Million) | Bear<br>(Rp Million) | Base<br>(Rp Million) | Bull<br>(Rp Million) | Rationale                               |
|------------------------|------------------------|----------------------|----------------------|----------------------|-----------------------------------------|
| Delivery Service       | 5,779,206              | 6,068,166            | 6,212,646            | 6,299,335            | Mature segment, stable growth           |
| Service Fee            | 5,689,230              | 5,518,553            | 5,632,338            | 5,746,122            | Structural break, gradual normalization |

### ❖ Lending Growth Expected to Normalize as the Portfolio Scales

Lending revenue is projected to grow between 35% and 75% in FY2026, compared with the exceptional 95,4% growth recorded in FY2025. As the lending portfolio becomes significantly larger, sustaining the same growth rate would require a substantially higher volume of new loans. In addition, tighter fintech lending regulations and the need to maintain credit quality support a more moderate growth outlook. The Bear Case assumes management prioritizes asset quality over expansion, the Base Case reflects disciplined portfolio growth, while the Bull Case assumes accelerated expansion supported by new strategic partnerships.

### ❖ Base Case Projects GoTo's First Net Profit

Under the Base Case, GoTo is projected to report its first annual net profit since inception, reaching approximately Rp951B. This outlook is supported by three key assumptions: continued double-digit revenue growth, expense growth remaining below revenue growth, and the absence of significant non-recurring charges. In addition, accumulated tax losses are expected to keep the effective tax burden minimal, allowing operating improvements to translate into positive net earnings.

#### ❖ Even the Bear Case Reflects a Fundamentally Stronger Business

The Bear Case assumes slower growth but does not anticipate a return to GoTo's historical cash-burning business model. Following Tokopedia's deconsolidation, the Company's cost structure has become structurally leaner, share-based compensation has largely normalized, and operating cash flow has turned positive. These structural improvements provide a more resilient financial foundation, even under conservative growth assumptions.

---

## 5. RISKS & KNOWN LIMITATIONS

### MAIN RISKS

- **Risk 1: Lending Segment Credit Risk**

Rapid lending expansion increases GoTo's exposure to credit risk. Although current provisioning remains conservative, sustained portfolio growth could pressure asset quality if underwriting standards fail to keep pace. Higher credit losses would directly impact future profitability through increased impairment expenses.

- **Risk 2: Data Comparability Post-Deconsolidation of Tokopedia**

Tokopedia's deconsolidation materially changed GoTo's reporting structure beginning in FY2024. As a result, revenue and expense trends for affected segments are not fully comparable with prior periods. Historical growth should therefore be interpreted in the context of this structural change rather than as a purely operational trend.

- **Risk 3: Normalization of Share-Based Compensation (SBC)**

The sharp decline in Share-Based Compensation (SBC) significantly improved reported profitability in FY2025. However, as SBC is linked to employee equity programs, future grants could increase non-cash expenses and reduce reported earnings without affecting cash generation.

---

### KNOWN LIMITATIONS IN THIS ANALYSIS

- **Limitation 1: GTV and Take Rate Data Not Available**

This analysis excludes GTV and take-rate metrics due to limited public disclosure. Consequently, revenue growth cannot be decomposed into transaction volume and monetization effects.
